For Immediate Release

### **Geometric launches CAMWorks® 2015 for Solid Edge® ST8**

***CAMWorks 2015 now runs inside Solid Edge ST8, Siemens latest version of the Solid Edge 3D mechanical design software***

**Scottsdale, AZ, USA, & Mumbai, India - July 09, 2015:** [Geometric Limited](#) (BSE: 532312, NSE: GEOMETRIC), a leader in advanced manufacturing software releases CAMWorks 2015 for Solid Edge ST8. CAMWorks is the only fully integrated CAM application running inside Solid Edge.

CAMWorks is an industry leader in knowledge-based machining, proprietary feature recognition, and true G-code machine simulation. These technologies enable the automation of the programming process, which result in faster CNC programming, faster setups, plus faster and more concise machining.

CAMWorks for Solid Edge ST8 supports a wide variety of CNC machining needs within Solid Edge. In addition to 2-1/2 and 3-Axis milling support, 4 and 5 simultaneous milling and multi-axis Mill Turn machining are all now fully supported. Using CAMWorks inside Solid Edge, the design and manufacturing models become one in the same and the fully associative tool paths will update automatically to design changes. The proprietary automatic feature recognition and patented technology database also allow users to capture and automatically reuse their best practices to significantly reduce programming time.

CAMWorks Virtual Machine is also available for Solid Edge, providing true G-Code machine simulation with collision detection to eliminate dry-runs and significantly reduce setup time. In addition, Geometrics' high speed machining module, CAMWorks VoluMill™ can be used to dramatically reduce cycle time and greatly increase tool life for rough milling operations. Geometric has also amassed a post processor library made of all the major machine tools to aid in rapid implementation of CAMWorks.

CAMWorks is available in 11 languages and is sold in over 60 countries.

#### **About Geometric:**

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services, Product Lifecycle Management (PLM) solutions, Embedded System solutions, and Digital Technology solutions enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Listed on the Bombay and National stock exchanges in India, the company recorded consolidated revenues of Rupees 11.05 billion (US Dollars 180.61 million) for the year ended March 2015. It employs over 4800 people across 13 global

delivery locations in the US, France, Germany, Romania, India, and China. Geometric has been assessed at Maturity Level 3 for CMMI 1.3 - Development and CMMI 1.3 - Services for its Software and Engineering Services business units and is ISO 9001:2008 certified for engineering operations. The company's operations are also ISO 27001:2005 certified.
