Turnkey 5-AXIS MACHINING Solution Gets Businesses Up and Running Faster

CAMWorks® CNC Machining Software by Geometric and Ganesh Machinery Partner to Provide Cost-Effective Turnkey 5-Axis Machining Solution

Scottsdale, AZ, USA, & Mumbai, India, December 22, 2015: Geometric Limited (BSE: 532312, NSE: GEOMETRIC), a global leader in 3D CNC machining software, in partnership with Ganesh Machinery, a leading CNC machine manufacturer, today announced the availability of a turnkey 5-axis CNC machining solution for the North American markets that provides a ready-to-use 5-axis CNC machine, enabling manufacturing organizations to implement advanced machining capabilities more quickly and cost-effectively.

This advanced machining solution includes [CAMWorks® 3D CNC machining software](#), Ganesh's new VFM 5X-8 5-Axis vertical machining center, and a certified post-processor. Because CAMWorks is bundled with the Ganesh 5-axis machine, the post processor is pre-programmed and certified, reducing the learning curve and time to productivity. State of the art training has also been prepared specifically for this bundle, further reducing challenges often arising when implementing advanced multi-axis machining solutions.

"As Ganesh enters the 5-axis CNC machining world, we realize that helping our customers become productive with our machines as quickly as possible demands the use of quality software with a clean post-processor," says Ganesh Owner, Harvinder Singh. "We wanted to package our machine with modern, easy-to-use CAM software that minimizes the learning curve and facilitates fast, successful implementation. We are familiar with CAMWorks software because we use it internally and believe it will help our customers get up and running more quickly. The fact that CAMWorks software utilizes the SOLIDWORKS® CAD modeler as its geometry engine is also a huge plus."

"As part of this bundle, we've developed a CAMWorks post-processor specifically for the Ganesh 5-axis machine, as well as a virtual machine simulation add-on for proving our complex toolpaths," explains Jim Foster, VP, Global Channel Sales and Marketing at Geometric. "Deploying 5-axis machining in a production environment is challenging, and many unforeseen delays related to software, post-processors, and training can occur. By partnering with Ganesh, we are helping businesses take 5-axis machining to production faster and without costly pitfalls."

About Ganesh Machinery:

Founded in March of 1985 with only a 1,200 sq. ft. facility, Ganesh Machinery has since grown into an industry powerhouse with a 15,000 sq. ft. facility, supported by a 40,000 sq. ft. warehouse. They are dedicated to excellent customer service with an emphasis on building and maintaining customer loyalty. They have sold and serviced machines to over 12,000 machine shops, technical schools, and more. They have a 4,000 sq. ft. showroom, fully stocked parts room, and an in-house training center.

About CAMWorks:

CAMWorks, a parametric, solids-based CNC programming software system, brings in a revolutionary way to help machinists around the world program smarter and machine faster. CAMWorks significantly reduces programming time and removes the drudgery from CNC programming by using patented Feature Recognition technology in conjunction with full toolpath to solid-model associativity and knowledge-based machining. About Geometric:

[Geometric](#) is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services, Product Lifecycle Management (PLM) solutions, Embedded System solutions, and Digital Technology solutions enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Listed on the Bombay and National stock exchanges in India, the company recorded consolidated revenues of Rupees 11.05 billion (US Dollars 180.61 million) for the year ended March 2015. It employs over 4800 people across 13 global delivery locations in the US, France, Germany, Romania, India, and China. Geometric has been assessed at Maturity Level 3 for CMMI 1.3 - Development and CMMI 1.3 - Services for its Software and Engineering Services business units and is ISO 9001:2008 certified for engineering operations. The company's operations are also ISO 27001:2005 certified.
