

# TEAMCENTER CAPA

## OUR CO-INNOVATION WITH SIEMENS PLM TO REDUCE COST OF QUALITY

In an intensifying competitive market driven by constant demands for improved program quality and costs, manufacturers are striving to achieve lean operations as well as first-time-right. On the other hand product design and supporting functions are getting more complex, any changes identified late in the product development escalates cost. Also recurrence of same defects across different products are resulting into heavy penalties in the form of warranties and recalls.

### Teamcenter CAPA (Corrective and Preventive Actions)

Teamcenter CAPA, our co-innovation with Siemens PLM, is an enterprise-wide product quality management solution that captures various forms of defects, non-conformances or complaints at any stage of product development.

The solution focuses on improving efficiency in quality through standardizing and automating the issue resolution process. It captures the knowledge within PLM environment helping remove the barriers between quality department and other teams; bringing quality into mainstream product and manufacturing engineering.

### Issue Management and Resolution through Teamcenter CAPA

- Standardizes and automates the process of issue resolution
- Captures the knowledge of issue resolution, making it easy to find quality information within your PLM environment
- Integral part of Teamcenter data model
- No additional infrastructure required
- Supported on Siemens PLM Active Workspace

### Benefits

- Enhanced product quality
- Real time visibility and traceability of issues associated with NPI deliverables
- Quick response to engineering changes
- Lesser non-conformance and issue resolution through automated workflows and notifications
- Better customer satisfaction by referring the historical failures

Hello, I'm from HCL's Engineering and R&D Services. We enable technology led organizations to go to market with innovative products and solutions. We partner with our customers in building world class products and creating associated solution delivery ecosystems to help bring market leadership. We develop engineering products, solutions and platforms across Aerospace and Defense, Automotive, Consumer Electronics, Software, Online, Industrial Manufacturing, Medical Devices, Networking & Telecom, Office Automation, Semiconductor and Servers & Storage for our customers.

Geometric is now a part of HCL Technologies
